

1.MediRide Business Model

Executive Summary

MediRide is a digital healthcare platform that connects patients with the nearest available ambulance through real-time GPS tracking. The platform enables one-tap SOS requests, transparent pricing, live tracking, and seamless communication between patients, drivers, and healthcare providers. Beyond ambulance services, MediRide also offers blood donor matching, hospital and doctor information, post-emergency follow-up, event medical coverage, and a web platform for users without the mobile application.

2.Business Model Canvas

2.1Key Partners
