

TrueDay

Test-drive candidates in a realistic work simulation before you make an offer.

Presented by: **Mahir Daiyan Safwaan**

true-day.vercel.app

Companies hire the person who interviews best. Not the person who performs best.

- The gap between interview performance and job performance is massive.
- Traditional interviews reward charisma and preparation.
- Real jobs demand prioritization, resilience, and execution under pressure.

\$17,000

Average direct cost of a
bad hire

89%

of hiring failures are
culture fit, not skill

A 3-day work simulation built from your real company context. Automatically.

Day 1

30 to 40 minutes. Real scenarios hit. Decisions begin. The simulation pauses.

Day 2

20 to 30 minutes. Day 1 decisions play out. Follow-through is revealed.

Day 3

20 to 30 minutes. Two pressures converge. Who they actually are becomes visible.

Hiring Manager receives the Moment Replay — 5 key decisions, not a score.

Candidate receives a Personal Debrief — behavioral insights they keep forever.

Here is what Day 1, 10:42 AM looks like

PR-087 OPEN

Feat: Beacon pipeline v2 output schema

Author: Priya Nair

DESCRIPTION

Pushes the new event payload layout required for dashboard query scripts. This adds the nested metrics block containing live ad views.

CODE CHANGES

src/config/kafka.ts

export interface BeaconPayload {
- addId: string;
+ addId: string;
+ performanceMetrics: {
+ impressions: number;
+ clicks: number;
+ ctr: number;
+ };

and Many More

1. Urgency Recognition
2. Junior Colleague
3. Priority Manager Alignment
4. Multitasking Capacity
5. Communication

We track their tab-switching, dwell times, and exact prioritization sequence when two conflicting pressures hit simultaneously.

A curated playback of their 5 most critical decision moments, accompanied by the unedited, raw Slack messages and Jira updates they produced under heavy cognitive load.

Plots the candidate's behavioral metrics against your company's historical applicant pool, identifying their exact blind spots before the final interview.

Zero setup. Real company context. Done in ***2 minutes.***

We measure what no interview ever could.

Response Latency

How long they take to respond to different types of pressure.

Selective Attention

What they prioritize when two things hit simultaneously.

Communication Shifts

How their writing changes as stress accumulates.

Follow-Through Consistency

Whether Day 3 closes loops opened on Day 1.

A category no one else occupies.

Platform	Faster Screening	Skill Tests	Behavioral Pressure Simulation	Company-Specific Context	Outcome Learning
Airwork AI	✓	✗	✗	✗	✗
HireVue	✓	✓	✗	✗	✗
Pymetrics	✓	✓	✗	✗	—
Trueday	✓	✓	✓	✓	✓

The Moat: Every hire tracked through Trueday builds a proprietary behavioral dataset no competitor can buy. It only grows with usage.

A massive underserved market with no behavioral simulation player.

The TAM for the Global HR Technology Market is valued at **\$42.5 billion** in 2025 with a forecasted **12.8% CAGR**.

Furthermore, the global average time to hire has reached **44 days**.

Priced like software. Valued like hiring insurance.

Starter \$199 /mo

- Up to 3 Active Job Roles
- 20 Candidate Simulations / month
- Core 3-day format
- Moment Replay & Candidate Debrief

Growth \$499 /mo

- Up to 10 Active Job Roles
- Unlimited Candidate Simulations
- Outcome Tracking & Benchmark Scoring
- ATS Integration

Scale \$999 /mo

- Unlimited Roles & Candidates
- 7-day Senior Executive Format
- Behavioral Dataset API
- Dedicated Success Manager

One prevented bad hire saves **\$17,000**. The Growth plan costs **\$5,988** per year. The product pays for itself before *Month 2*.

Contact

Every other hiring tool shows you who a candidate says they are.

***Trueday shows you who they
actually are.***
