

CampusHub BD

Concept

CampusHub BD is a digital platform that brings together university communication , student services , career opportunities and campus activities in one place . It helps student stay connected , informed and engaged through a trusted and verified system

Problem statement

University information is scattered across Facebook ,Messenger ,WhatsApp , emails and Notice boards . Students often miss important announcements ,events , and internship opportunities . buying and selling , lost items and club activities are also unorganized .

Proposed Solution

campusHub Bd provides one verified platform for universities , students , clubs and companies . Role-based access ensures trusted information while giving students a single destination for campus life .

Core Modules

Campus Feed

The campus feed is a central information hub of the campusHub platform , designed to keep university students informed about academic , professional and extracurricular activities happening across Bangladesh . It provides a timeline of upcoming events , allowing students to easily discover what is happening today , this week , this month or on a specific future date . The feed includes a wide range of verified campus - related activities such as :

- University competitions
- Workshops and seminars
- Hackathons
- Research conferences
- Cultural and sports events
- Career fairs
- Club activities
- Scholarship and academic opportunities
- National and international educational events

All posts are automatically organized by event date, enabling students to browse upcoming activities through calendar-based filters (Today, This Week, This Month, or

Custom Date). This ensures that students never miss important opportunities and can plan their participation in advance. To maintain the authenticity and reliability of the information, posting access is currently restricted exclusively to verified Department Class Representatives (CRs). Each department's CR is responsible for publishing official announcements and events related to their department. This role-based posting system minimizes misinformation and ensures that all published content comes from trusted sources. In future versions of the platform, posting permissions may be extended to Club Administrators, University Administrators, and Verified Organizations, enabling a broader range of official announcements while preserving content quality through role-based access control.

Key Features	Benefits
• Date-based event timeline • Official University announcements • Department-specific event posts • Event categories and filters • Search and bookmark functionality • Real time event notifications • National and International academic event updates	• Ensures students accurate and verified campus information • Eliminates the need to search through multiple facebook groups and messaging platforms • Increases students participation in academic , cultural and professional events • Creates a centralized and trusted communication platform for universities across Bangladesh

Marketplace

The marketplace is a secure , student-only platform where verified university students can buy , sell or exchange new and used items within their campus community . It provides a trusted alternative to social media marketplaces , marketing transactions safer and more organized . Students can list products by uploading photos , adding descriptions and setting prices , while buyers can browse listings , search by category and contact sellers through the platform . Students can easily exchange essential items such as Books & Notes, Calculators, Laptops & Electronics , Hostel Items , Furniture and Bicycles .

Key features	Benefits
--------------	----------

• Verified students only access • Buy , sell and exchange items • Product images and descriptions • Search and category filters • in -app chat • Reports listings • Campus pickup supports	• Safe and trusted student marketplace • Affordable used products • Easy buying and selling within the university community
--	---

Lost & Found

The lost and found module helps students quickly report and recover lost belongings within their university community . Students can post details of lost or found items with contact and locations , making it easier to reconnect items with their owners. The system supports various categories including student ID , Wallet , Mobile phone , laptop , Calculator , Keys Documents and others .

Key features	Benefits
• Report lost or found items • Uploads photos • Add location and date • Contact the finder or owner	• Increases the chances of recovering lost items • Creates a trusted campus community • Reduces the time and effort needed to find lost belongings

Skill & courses

The skill and courses module is a learning marketplace where university students , instructors and verified companies can publish both free and paid courses . It helps students gain industry- relevant skills while allowing individuals and organizations to share knowledge or sell professional training programs . . The system supports various categories including programming , AL & Data science , Robotics , Graphic design , Autoad , Ielts , freelancing and others

Key features	Benefits
--------------	----------

• Publish free and paid courses • Buy and sell courses • Course details , pricing and certificates • Easy enrollment and learning	• Provides affordable and accessible learning opportunities • Creates income opportunities for students • Helps students develop job ready skills • Connects learners with quality educational content
--	---

Internships & Jobs

The internship and jobs module is a centralized career portal where verified companies and organizations can publish internship and job opportunities . Students can explore the latest career openings , apply directly and updated With recruitment news from various industries

Key features	Benefits
• Latest internship and job news • Verified job and internship offers • Company profiles • Search and filter by category , company and location • Save and apply for opportunities • Application deadline reminders	• Easy access to verified career opportunities • Connects students directly with employers • Helps students prepare for their professional careers • Keeps students informed about the latest recruitment opportunities

Club management

The club management module provides a dedicated digital space for university clubs to organize activities , communicate with members and promote campus engagement . Verified club administrators can manage events and share official updates with students .

Key features	Benefits
• Club profiles • Event announcements • Member registration • Recruitment posts	• Simplifies club management • Increases student participation • Improves communication between clubs and members

• Gallery and achievements • Club notices and updates	• Promotes campus activities through one centralized platform
--	---

Challenges and Mitigation

- Challenges : user adoption , content moderation , fake listings , privacy and scalability
- Mitigation : university verification , role-based posting , reporting tools , secure authentication , moderation and cloud infrastructure

Expected Impact

- Faster and trusted communication
- Better student engagement
- Improved access to internship and careers
- Affordable campus marketplace
- Stronger collaboration among students , clubs , universities and industry
- Better industry-academia connection
- Quick recovery of lost items through a verified Lost & Found system
- A unified digital campus ecosystem for universities across Bangladesh

App Roadmap

- **Phase 1** : campus feed , marketplace , lost and found , internship and jobs , skills and courses , club management , scholarship portal
- **Phase 2** : Ai study assistant , Ai career mentor , resume builder , campus wallet , digital student ID

Conclusion

CampusHub BD aims to become the digital operating system for universities in Bangladesh by connecting students , universities , clubs , companies and opportunities on one trusted platform.
